

Member Tested and Recommended Program

Monday, April 12, 2010

Thank you for participating in our “Member Tested and Recommended Program.” The **5.56 NATO 62 GR TAP Barrier** has been tested and recommended by the members of the National Tactical Officers Association. Your overall score was a **4.95**. The NTOA Member Tested and Recommended logo may be used solely on the specific product that was tested.

Attached with this letter, is the Member Tested and Recommended Logo which can be used on all marketing pieces for this product. Also attached is a copy of the complete reviews that your company can use as well.

Press releases written regarding this product review must be emailed to NTOA for review before release.

Since the review is completed, it will now be added to online Member Tested product database. To make the review complete, please send us a digital image of the product that has been tested. This is now listed on the NTOA’s Member Tested and Recommended online database and review will soon be published in *The Tactical Edge* journal.

Please contact Corey Luby at advertising@ntoa.org if you would like to advertise in *The Tactical Edge* journal. Once again, thank you for participating in the Member Tested and Recommended Program©.

Thank you,

Corey Luby

This ammunition was tested in a Bushmaster M-4 variant, from standing and standing supported positions. Due to the weather conditions at the time, ballistic gel could not be used, however it was fired into frozen 20 ounce water bottles and 20 ounce unfrozen water bottles.

The performance on this round was a little better than on the .223 62 grain barrier round simply because this round is a NATO specs round, designed specifically for the platform from which it was being fired.

I tested Hornady's 5.56 NATO 62 grain TAP Barrier ammunition which is Hornady's line of law enforcement ammunition.

The ammunition came in three boxes, twenty rounds per box. Upon receipt of the ammo I took it out of the boxes and insured there were no deficiencies. There were no dents, scrapes or blemishes and the primers appeared to be in good condition.

At the range, I used a Colt M-4 with iron sights and a standard military issue magazine, filled with twenty rounds. The ammunition fed into the rifle fine, there were no jams or stoppages. The ammunition held about 3/4 of a minute of angle accuracy. Unfortunately I was not able to do any penetration tests with barriers.

As far as cleaning of the rifle, I didn't notice a difference between the Hornady ammunition and the ammunition I normally use.

I was confident in the ammunition I tested and would feel comfortable using it operationally.
